

It's a FIRE CRACKER----Disappearing 9 Patch

You will be cutting 2—11" squares: Cut 4 white 4"x4" squares

Cut 7 red 4"x4" squares

Cut 7 blue 4"x4" squares

The A square will have: 4 Red 4"x4" squares

3 blue 4"x4" squares

2 white 4"x4" squares

The B square will have: 4 blue 4"x4" squares

3 red 4"x4" squares

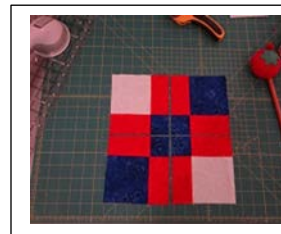

2 white 4"x4" squares

My squares ended up, before squaring at 11"

Now it's time to cut your square in half, vertically, and horizontally through the center square.

The center square dissects at 5 1/2". Turn squares over to cut, and they will lay flatter.

Rotate the 4 newly cut squares 180 degrees: The small squares and rectangles will be on the outside of your finished square.
