

Easy Rail Fence

You will need 3 different fabrics.

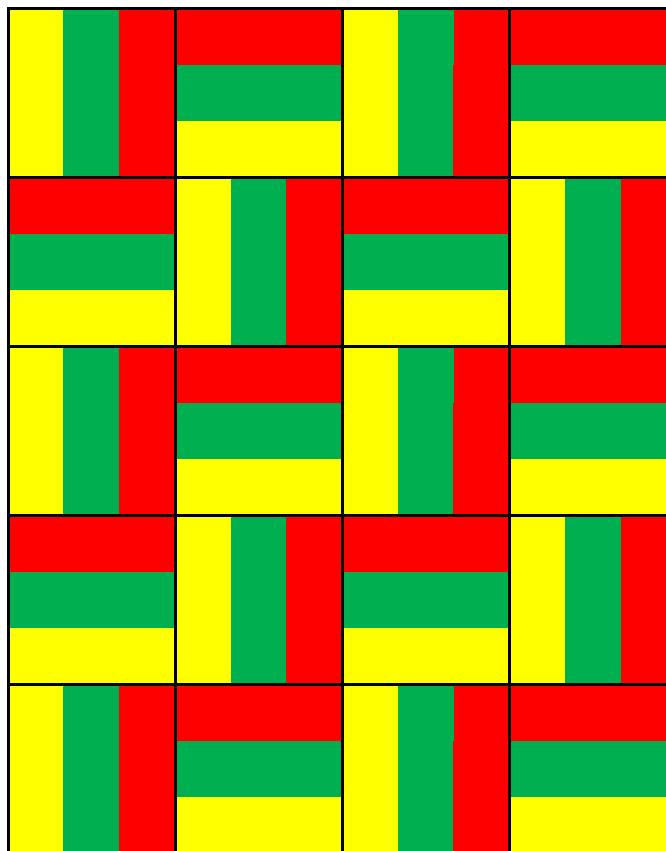

Cut twenty 9 1/2" x 3 1/2" blocks from each of the three fabrics.

Select one block of each fabric and piece them together.

Do the same for all of the other blocks, keeping them in the exact same order as the first block.

When these are done, sew the blocks together by alternating one going vertically and one going horizontally, again, keeping the colors in the exact same order. You'll get a wonderful "stair-step" pattern!

A quilt made with 20 blocks (4 across/5 down) will measure 36" x 45" (without any borders, should you decide to add some).
